

Heavy Duty ○ Easy on the Hands

Our heavy-duty cutters are made of 1 piece of long wearing drawn steel with a Nickel plated finish.

These strong but light-weight cutters have a curved metal hand grip that assures comfort and accuracy in long usage.

The Thick metal will withstand banging on the table when cutting dough. These cutters are shaped from a single metal sheet without any welding joints and will not warp or bend out of shape with heavy usage.

Used by major donut companies.

Donut Cutter - Ring
RSM-D275
Ø 7 cm (2 ¾")

RSM-D225
Ø 5.7 cm (2 ¼")
